Objective

Detail-oriented Python Developer with a foundation in AI and Data Science, seeking to contribute to scalable software solutions. Skilled in Python, machine learning, and data visualization, with a passion for solving real-world problems and building intelligent systems.

Technical Skills

- **Languages:** Python, Java (Basic), SQL
- **Libraries/Tools:** Pandas, NumPy, Scikit-learn, Power BI, Excel, GitHub
- **Concepts:** Machine Learning, Data Analysis, Predictive Modeling, REST APIs
- **Soft Skills:** Problem Solving, Leadership, Communication
- **Languages Known:** Tamil, English

Projects

- **Kidney Disease Prediction** – Improved ML model accuracy by optimizing feature selection and preprocessing. Used Python, Pandas, and Scikit-learn.
- **Class Attendance Management System** – Developed a Python GUI tool to automate attendance tracking with CSV export and summary reports.
- **AI Agent and Chatbot** – Built a rule-based chatbot with basic NLP capabilities for task automation and user interaction.

Internship

Fantasy Solution

Data Science Intern

Worked on data cleaning, exploratory analysis, and model building for client datasets. Collaborated with team to deploy predictive models and generate insights.

Education

- **Gnanamani College of Technology** – B.Tech in AI Data Science
CGPA: 7.313
- **GHSS** – Higher Secondary (12th), 2021–2022
Percentage: 80.6%
- **GHS** – Secondary School (10th), 2019–2020
Percentage: 70.6%
